DESCRIPTION AND JUSTIFICATION

DESCRIPTION: This project is to construct a new Regional Medical Center (RMC) and make improvements to existing health facilities in the Prince George's Hospital System. Funding is provided based on a memorandum of understanding entered into by the State, Prince George's County, and Dimensions Healthcare in 2008, and updated in 2011 to include the University of Maryland Medical System and the University System of Maryland. The agreement included a commitment to construct the RMC, with the State, County and Dimensions or another private entity each providing approximately \$200 million toward the project cost.

JUSTIFICATION: The new Regional Medical Center will be a state-of-the-art facility, which is being constructed as a part of a strategy to transform the County's healthcare system into an efficient, effective and financially viable healthcare delivery system which will improve the health of residents of Prince George's County and the Southern Maryland region.
